

# 2024-08-02---Rocky-Stick-erstellen

## Abkürzungen:

- `#f` = filesystem
- `#sdc` = Stick
- `#dd` = discdump
- `#dd` = discdestroyer

```
dnf distro-sync
```

```
dnf install wget
```

```
mkdir -p /home/y3d/Download
```

```
mkdir -p /home/admin/Download
```

```
wget https://download.rockylinux.org/pub/rocky/9/isos/x86_64/Rocky-9.4-x86_64-boot.iso ; sha256sum Rocky-9.4-x86_64-boot.iso
```

```
lsblk -f /dev/sdc
```

- input file outputfile bs= blocksize

```
dd if=/home/admin/Download/Rocky-9.4-x86_64-boot.iso of=/dev/sdc bs=8M status=progress
```

- um den lokalen Platten cache zu leeren und diesen auf den Stick(**sdc**) zu schieben

```
sync
```

- wir lassen uns den Alias anzeigen

```
cd etc/
```
